

## Federally Qualified Health Center Governing Board Composition Worksheet

There is an expectation that FQHC boards will reflect the demographics and socioeconomic circumstances of their target populations. This tool is designed to help FQHC Boards analyze their current vs. ideal composition. Fifty-one percent (51%) of governing board members must be regular users of the health center's services. The remaining 49% of board members should be chosen for the expertise and experience they bring to the board.

Consumer Board Members						
Primary Constituencies	Percent of Target Population	Percent of Patients	Target Number of Board Members	Current Number of Board Members	Additional Members Needed	Notes
Male						
Female						
Under 20
